Rack Mount kits

Get organized with added flexibility maximizing available space

Example Split 1U Din Rail Rack mount bracket

Overview

The new AKCP Rack Mount kits are available in different configurations to help meet your requirements. There are three different configurations to ensure that all your permutations are covered. Whatever your cabinet space requirements are, AKCP has the appropriate answer. Get your server cabinets organized and utilize the space to maximize efficiency

Single 1U Din Rail Rack mount kit

- Ideal for mounting your sensors
- sensorProbe 2 combinations
- No more wasted space
- No more blank brackets

Split 1U Din Rail Rack mount kit

- Ideal for fitting a sensorProbe plus sensors
- Ideal for fitting securityProbe plus sensors
- 8.5" of space available for sensors

Double Rack mount kit

- only takes up 1U
- Ideal for mounting the securityProbe plus an expansion unit
- Units mounted side by side in 1U rack
- Option to add the Single 1U Din Rail Rack above to mount sensors

Example concept mounting AKCP devices and sensors using the rack mount kit system
